

1. Go to: *yoursite/admin/config/services/rest*

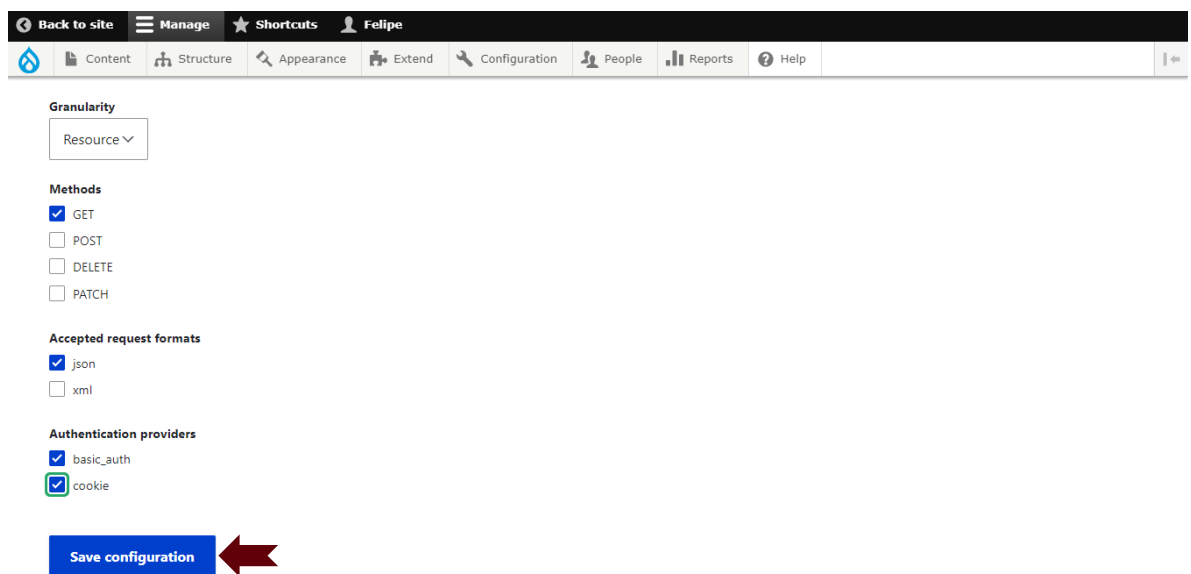

Here you can enable and disable available resources. Once a resource has been enabled, you can restrict its formats and authentication by clicking on its "Edit" link.

Enabled

Resource name	Path	Description	Operations
Content	<code>/node/{node}:</code> GET, PATCH, DELETE <code>/node:</code> POST	methods: GET, POST, PATCH, DELETE formats: json authentication: basic_auth	Edit 
Paragraph	<code>/entity/paragraph/{paragraph}:</code> GET, POST, PATCH, DELETE	methods: GET formats: json authentication: basic_auth, cookie	Edit 

2. Insert data listed below in the form:

Granularity
Resource 

Methods
☒ GET
☐ POST
☐ DELETE
☐ PATCH

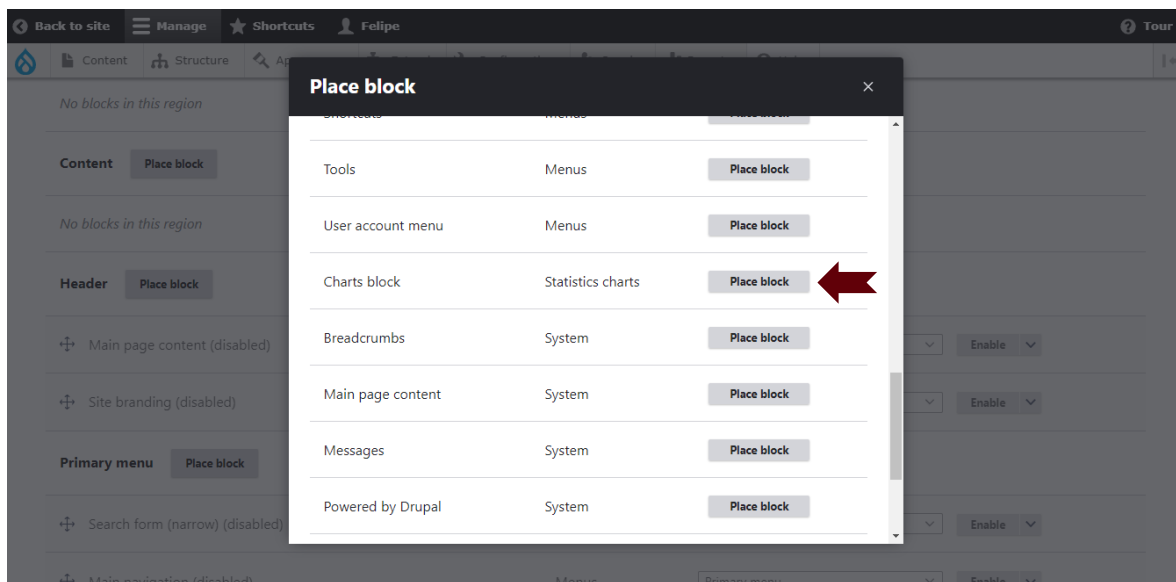

Accepted request formats
☒ json
☐ xml

Authentication providers
☒ basic_auth
☒ cookie

Save configuration 

3. Click on save configuration.

4. Go to: *yoursite/admin/structure/block*
5. Place the Charts block in the region of your preference

6. Save blocks.
7. Go to *yoursite/node/add/chart*.
8. Fill the form and remember to unmark published.

The screenshot shows the 'Add Chart' form in Drupal. The form includes fields for text format, graph styles, and suffix. A red arrow points to the 'Published' checkbox, which is unchecked.

Text format: Basic HTML

Graph Styles: Florida

Suffix: \$

☐ Published

Buttons: Save, Preview

9. Start adding new charts to your new Chart block, enjoy.
